

Finance

The Business Department offers majors in accounting (BC), finance, healthcare administration (HS), marketing (BK), management (BN) human resource management, and business (Adult Accelerated) and minors in accounting, finance, economics (EC), human resources, and business administration (for non-business majors). While offering students the opportunity for specializing in a particular major, the program maintains a broad base that includes exposure to various phases of business and the use of information technology in a business setting.

Upon graduating, Business majors will have the ability to succeed, for example, in: preparing a comprehensive strategic plan; developing a global business perspective; and identifying and interpreting laws affecting labor in the workplace.

The **finance major** prepares students to work in any of the major areas of the field of finance. These areas include commercial banking, financial planning, investment analysis, corporate financial analysis, investment banking, etc. Many of these areas are expected to grow in demand for the foreseeable future. The coursework required for this major gives students a well rounded background in business and finance. Students will learn core financial skills and how to apply them. They will also learn to think analytically and solve problems in an uncertain environment.

Upon graduating, Finance majors should be able, for example, to: compute the cost of capital for a company and make capital budget decisions; make financial forecasts and analyze financial statements; and use metrics to value companies and their stocks.

Core Requirements for all Business Majors
