

Applied Management

The **applied management** major has been designed for students transferring to Mount Mercy from a two-year institution who have a background in a technical specialty with an Associates of Applied Science degree. The major provides students the opportunity to broaden their knowledge of business environments and to understand and manage the forces of change affecting organizations in a business environment. The applied management major prepares students for a broad variety of career options by building on their previous technical training and/or work experience.

This degree prepares students, for example, to: apply strategic planning principles to a technical specialty area; prepare a comprehensive strategic plan; and develop analytical and critical-thinking skills and apply those skills to the management of a business.

The applied management major is offered at both Cedar Rapids and Waterloo campuses.

See the Graduate section (<http://catalog.mtmercy.edu/archives/2014-15/graduateprograms>) of this *Catalog* for more information on Graduate programs offered at Mount Mercy.
