

# Healthcare Navigation

This area of study is designed to meet the demand in the health care industry for professionals with education and training in healthcare navigation to provide each consumer, provider, and system of health care the highest level of benefit and coordination in the areas of community resources, clinical care, and health insurance. This is a vital role for an individual with a desire for a non-clinical healthcare service career who, through coursework and experiential learning at Mount Mercy University, develops expertise in navigating all areas of the continuum of healthcare service and delivery. Additionally, a MMU nursing graduate with a minor in Health Navigation enters the work force with a greater capability for case management, care coordination and nursing leadership roles. A broad background in the liberal arts and sciences provides the foundation for students who wish to develop a better understanding of a very complex system that encompasses a work force of millions. This major will provide the foundation for non-clinical work in advocacy, supervision, management, and policy development.

See the Graduate section (<http://catalog.mtmercy.edu/archives/2017-18/graduateprograms>) of this *Catalog* for more information on Graduate programs offered at Mount Mercy.

## Healthcare Navigation Major

BC 202	Accounting: Information for Decisions	4
