History

The history curriculum provides opportunities for students to investigate the social, economic, political, and cultural development of diverse peoples from the beginnings of civilization to the present. The courses in the history curriculum will enable students to gain a deeper understanding of the human condition and the relationship between historical developments and contemporary social and political trends. Emphasis is placed on reading, writing, researching, speaking, and on critical and analytical thinking. Through their course of study, students will acquire the skills necessary to further their liberal arts education and to become thoughtful participatory members of society.

The history major serves as preparation for careers in education, business, journalism, government, and historic preservation as well as entrance into graduate and law school. The history minor provides an opportunity for students to combine an interest in history with one of the institution's other majors.

As a supplement to their classroom experiences, history students will have the opportunity to do independent study, internships, and to avail themselves of travel courses offered during Winter Term and some summer sessions.

Students in this major acquire knowledge that enables them, for example, to: demonstrate their grasp of historical methodology; gain a deeper understanding of the social, economic, political, and cultural development of diverse people; and connect major historical events to our contemporary world.
